Public Health Service; Office of Research on Women's Health; Notice of Meeting—"Biologic & Molecular Mechanisms for Sex Differences in Pharmacokinetics, Pharmacodynamics and Pharmacogenetics"

Notice is hereby given that the Office of Research on Women's Health (ORWH), Office of the Director, National Institutes of Health (NIH), will convene a workshop on May 5, 1999, 8:30 am-5:45 pm; May 6, 1999 at 8:30 am-12:30 pm.

The research planning workshop will address current and future research on differences in the ways in which women and men respond to pharmacologic agents. This workshop will provide a forum for scientific discussion of the biologic and molecular mechanisms that underlie differences in the effects and action of drugs in women and men. While data are limited, studies have documented differences between women and men in the safety and effectiveness of some drugs and, on a molecular level, in differences in drug metabolizing enzymes. The workshop will feature scientific presentations that will delineate the current state of knowledge, identify emerging issues or continuing gaps in knowledge, and catalyze discussion of methods to assess and predict sex-based and individual variations in response to drugs. The program will feature leaders in the fields of pharmacokinetics, pharmacodynamics, pharmacogenetics, hormonal influences on drugs, and new technologies in drug development.

Also serving as co-sponsors of this research planning workshop are the Office of Women's Health of the U.S. Food and Drug Administration; National Heart, Lung and Blood Institute, National Human Genome Research Institute; National Institute on Aging;
